**How to install Cadecraft games**

If you want to play one of my desktop games, follow the steps below to install it.

Note: most of my games are exclusive to Windows 64bit operating systems.

1. Download the `.zip` file onto your computer (from google drive link on `https://cadecraft.herokuapp.com/`, or wherever you got it from). If there are multiple versions, it is suggested that you download the latest version. A virus warning may appear, but this is simply due to the large file size, so dismiss it.

2. It will have downloaded as a `.zip` file, so right-click and `extract` the folder wherever you want the game files to be.

3. Be sure to read the `.readme` file for any important information relevant to the game.

4. Now, simply run the `.exe` file to play the game! Consider also creating a shortcut by right-clicking and choosing `create shortcut`.

Questions?

Join the Discord Server to give me feedback and suggestions on my games and tools (or just if you're bored). I am always happy to help ^-^
